PRIMARY PATENT EXAMINER

REASONS FOR ALLOWANCE

1. This is an Examiner's statement of reasons for allowance. The closest prior art Pickering U.S. Pat. No. 5,483,445 discloses an automated system/method for consolidating a plurality of individual company charges for a customer with different periodic company billing and payment due dates.

Nakano et al discloses a customer managing system which performs the financial management of a customer based on an ID code attached on the customer.

IBM Technical Disclosure Bulletin discloses a method of obtaining transaction completion codes in a point-of-sale system.

However, neither Pickering nor Nakano and IBM Technical Disclosure Bulletin singularly or in combination ~~disclose~~ disclose the recited feature:

As per claim 1 " a database for storing a customer ID associated with each customer, an account ID associated with each account, and a presentation ID associated with each presentation instrument, the database structured for relating each presentation ID to a specific customer and to one account used by that specific customer, and a database management system for managing the data stored in the database and for posting transaction data to any account in response to receiving a presentation ID with such transaction data, the presentation ID being used by the data management system to access the account and thereby reflect that the transaction has been conducted for the account".

As per claim 15 " storing in the database a customer ID associated with each customer, an account ID associated with each account, and a presentation ID used by each

customer for accessing at least one of the accounts, the presentation ID being different than the customer ID, and managing the database in order to post a transaction by a specific customer to a specific account in response to receiving transaction data with the presentation ID issued to the specific customer, the presentation ID being used by the data management system to retrieve the account ID of the specific account and thereby associate the transaction data with the specific customer and with the specific account”.

As per claim 23 “ means for storing a customer ID associated with each customer, an account ID associated with each account, a presentation ID associated with each presentation instrument and a role identifier associated with each customer and identifying a role that such customer has in connection with an account, the database structured for relating each presentation ID to both a specific customer and to an account used by that specific customer, and means for managing the data stored in the database and for posting transaction data to any account in response to receiving a presentation ID with such transaction data, the presentation ID being used by the data management system to access the account and thereby reflect that the transaction has been conducted for the account”.
